

WORKING AT HEIGHTS

Enabling professionals for the work at height on wind turbine

GRETA du MAINE

Training

TRAINING FRAMEWORK

This continuous training allows professionals to acquire the technical skills related to travel and safety work on onshore and offshore wind turbines.

Objectives:

- Understand the general safety rules during the works at height ; Identify the various Personal Protective Equipment (PPE) and anti-fall protection equipment.
- Be able to evacuate a wind turbine in an emergency.

TRAINING CONTENT

- Working in rope: know how to identify and assess the risks of falling height on different workstations and choose the appropriate devices of protection ; mastering technics related to the use of safety harnesses and fall arrest systems ; acquire the practices of check and maintenance of the equipment ; prevention of suspension trauma ; mounted on a wind scale ; circuit training.
- Using of Personal Protective Equipment (Harness, trolley, shock absorbers, carabiners, link lanyard,...): the equipment standards, class of protective equipment.
- To save: Acquire the different ways of evacuation and rescue of a victim during work at height.

SPECIFIC CONTRIBUTION IN MRE

The **GWO certificate**, recognized internationally by companies in the wind turbine sector, is granted at the end of the training course. It will give you operational employability to intervene on offshore wind turbines.

The contents and the organization of training is in compliance with « Global Wind Organisation Standard » Basic Safety training (BST) and Basic Safety Training Refresher (BSTR).

Validity of the module: *the GWO certificate delivered is valid for 24 months.*

MODULE REFRESHER FIRE AWARENESS - 6H – 1 DAY

Type of training

- Continuing
- Leading to qualification GWO certificate

Audience

Staffs assigned to reach on wind turbine in condition of safety

Prerequisite to entry

Medical capacity at work at height.

Output level

Professional accreditation

Training cost and duration

- 1220 euros / internship
- Duration: 16h in 2 consecutive days

Training location

GRETA du Maine
28 rue des Grandes Courbes
72 100 Le Mans
